Declaration Of Conformity To Standard ČSN EN ISO 1461

Description of product:

Fe-Zn coating on surface of steel parts made by method of dipping the product into melted Zinc.

Purpose of layer:

Layer ensures long-term protection against corrosion of the product by better mechanical resistance, extending durability, honoring environmental principles.

We declare and confirm:

Coating conforms to the requirements of the Act No. 22/1997 Digest, § 8, para. 2, determining safety of products and conformity according to § 13 para. 2 in conformity to standard ČSN EN ISO 1461 - „Hot dip surfaces of Zinc laid on by method of dipping steel products”.

Following acts were taken into account on evaluation of the conformity and properties of Zinc coating and their respect to steel products, covered by Zinc (generally):

- ČSN EN ISO 1461 Hot coatings of Zinc put on by method of dipping steel products.
- Specification and test methods – ČSN EN ISO 14 713 Protection of frames against corrosion.

Place of release: Chudeřice 154 – Bílina

Date of release: 1.1.2015
